

What Is Claimed Is:

1 1. A method of making an animal feed that improves the insect  
2 repellency of the animal, the method comprising the steps of:

3 a) providing a feed material; and

4 b) adding an insect repellency additive consisting of  
5 effective amounts of garlic and sulfur to the feed.

1 2. The method of claim 1, wherein the animal is a ruminant  
2 animal.

1 3. The method of claim 1, wherein the feed is dog or cat food.

1 4. The method of claim 1, wherein the feed is chicken feed.

1 5. A method of attracting ruminant animals comprising:

2 adding an effective amount of garlic and sulfur to a  
3 ruminant animal mineral supplement; and

4 placing the supplement in one or more locations that are  
5 accessible by the ruminant animals.

1 6. The method of claim 5, wherein the supplement is either  
2 solid, liquid, or granular.

1 7. The method of claim 5, wherein the supplement is placed in a  
2 wild location.

1 8. The method of claim 5, wherein the supplement is a block  
2 having molasses and corn as components thereof.

1 9. The method of claim 8, wherein the supplement includes  
2 sodium carbonate as a major component.

1 10. The method of claim 1, wherein the garlic and sulfur amounts  
2 are at least 0.1% garlic and 0.3% sulfur on a weight basis of the  
3 attractant.

1 11. The method of claim 10, wherein the garlic and sulfur  
2 amounts are at least 0.5% garlic and 0.5% sulfur on a weight  
3 basis of the attractant.

1 12. The method of claim 5, wherein the garlic and sulfur amounts  
2 are at least 0.1% garlic and 0.5% sulfur on a weight basis.

1 13. The method of claim 12, wherein the garlic and sulfur  
2 amounts are at least 0.5% garlic and 2.0% sulfur on a weight  
3 basis.
